

# Urban Trees and Stormwater Community Meeting

Trees improve air quality, provide shade, decrease erosion and remove pollutants from stormwater. A study to assess how trees can be better integrated into stormwater management has been completed for unincorporated Orange County through a grant provided by the Florida Forest Service.

We hope you will come and learn more about the study results and share your thoughts at this meeting!

## Trees and Stormwater Study | Final Community Meeting

Thursday | February 22, 2018 | 5:30 to 7:00 p.m.  
Orange County Environmental Protection Division  
3165 McCrory Place Suite 200 | Orlando | 32803
